

To the crew at 7 Enterprises, and esp Master machinists Steve

I can't begin to tell you how happy I am with the engine/tranny package you built for my Mini, The "Lunatic". The engine pulls smooth and hard from 3 grand to redline. Awesome power but still very street-able. The tranny shifts very smooth and being straight cut gears, is still quiet. At freeway speeds it purrs like a fine tuned watch.

I just got home from a 1100 mile road trip to the "Mini Meet West" gathering in Lake Tahoe. The highlight of the trip for me was the AutoX, where I timed the fastest lap for a street legal car. Many cars were having trouble with the altitude, as high as 9000 feet, but my elec. fuel injection compensated perfectly and I never lost any power.

Cursing at 65 I was able to get 26 miles per gallon, pretty good considering the HP your engine makes. The whole trip down and back was smooth as glass, no problems at all, and no oil consumption at all.

Playing around with the car I have been able to do 0 to 60 times down to 6.5 seconds with slicks, and hit over 100 miles an hour with more left.

All in all I can't say enough about your engine. It is a work of art, Thank you again for a job well done.

Steve J.
